Subject: Document production

The TUS bates number you gave this afternoon does not match our production. Perhaps one of us wrote it down incorrectly. I have scanned the most recent production. The only engineering documents I saw were pages of user manuals. Clearly these are not CAD/CAM drawings in the sense presented to the Special Master this afternoon. Please send me the bates numbers of the TUS production that you contend contain CAD/CAM images.

We hope to have the sales summaries and the Tatung CAD/CAM drawings for you at the end of the day tomorrow
